

Achievement Dashboard Update Guide

Live Dashboard: <https://achievements-dashboard.netlify.app/>

GitHub Repository: <https://github.com/Metalbenji/achievements-dashboard>

Quick Update Process (5 minutes)

Step 1: Generate New Data in Streamer.bot

1. **Open Streamer.bot**
2. **Go to Actions tab**
3. **Find your "Update Dashboard Data" action**
4. **Click "Test Action"** (or run it)
5. **Check logs** for success message
6. **Note the file location** (usually `C:\StreamerbotData\Dashboard\achievements.json`)

Step 2: Update GitHub Repository

1. **Go to:** <https://github.com/Metalbenji/achievements-dashboard>
2. **Click on:** `data` folder
3. **Click on:** `achievements.json` file
4. **Click:** "Edit" button (pencil icon)
5. **Select all content** (Ctrl+A) and **delete it**
6. **Open the generated file** from Step 1 in Notepad
7. **Copy all content** (Ctrl+A, Ctrl+C)
8. **Paste into GitHub** (Ctrl+V)
9. **Scroll down** to commit section
10. **Add commit message:** "Update achievement data - [current date]"
11. **Click "Commit changes"**

Step 3: Wait for Site Update

- **Netlify automatically rebuilds** when you commit to GitHub
 - **Takes 1-2 minutes** for changes to appear live
 - **Check:** <https://achievements-dashboard.netlify.app/> to verify
-

Troubleshooting

"Failed to load achievement data" Error

- **Check:** Is the JSON file valid? (no syntax errors)
- **Try:** Copy-paste the content into a JSON validator online
- **Fix:** Make sure all brackets `{ }` and `[]` are properly closed

Changes Not Showing on Live Site

- **Wait:** Give it 2-3 minutes after committing
- **Check:** Go to Netlify dashboard to see if build is in progress
- **Force refresh:** Ctrl+F5 in your browser

Streamer.bot Action Not Working

- **Check:** Are all achievements loaded properly?
 - **Verify:** Do you have user data to export?
 - **Look:** At Streamer.bot logs for error messages
-

When to Update

Definitely Update After:

-  **Someone unlocks a new achievement**
-  **End of each stream** (to capture all chat activity)
-  **Big events** (raids, host trains, celebrations)
-  **Weekly** (to keep everything current)

Optional Updates:

- After adding new viewers to achievement tracking
 - When testing new achievement types
 - Before promoting the dashboard to viewers
-

Quick Tips

Making Updates Easier:

1. **Bookmark these links:**
 - Dashboard: <https://achievements-dashboard.netlify.app/>
 - GitHub Edit: <https://github.com/Metalbenji/achievements-dashboard/edit/main/data/achievements.json>
2. **Keep Notepad++ or VS Code handy** for viewing JSON files
3. **Use descriptive commit messages:**
 - "Update after stream - 5 new achievements unlocked"
 - "Weekly achievement data refresh"
 - "Added new user progress data"

Chat Commands to Remind Yourself:

```
!dashboard - Check achievements at: https://achievements-dashboard.netlify.app/
!achievements - View your unlocked achievements and progress!
```

File Locations (Important!)

Streamer.bot Generated Files:

- **Main file:** `C:\StreamerbotData\Dashboard\achievements.json`
- **Backups:** `C:\StreamerbotData\Dashboard\achievements_backup_[timestamp].json`

GitHub Repository Structure:

```
achievements-dashboard/  
├─ index.html (the dashboard webpage)  
├─ data/  
│   └─ achievements.json (the data you update)  
└─ README.md
```

⚠ Important Reminders

DO:

- ☒ **Always test** the Streamer.bot action before updating GitHub
- ☒ **Check the live site** after updating to make sure it works
- ☒ **Keep backups** of working JSON files
- ☒ **Update regularly** so viewers see current progress

DON'T:

- ☒ **Don't edit** the JSON manually (use Streamer.bot to generate it)
- ☒ **Don't delete** the achievements.json file, only replace content
- ☒ **Don't forget** to commit changes after editing on GitHub
- ☒ **Don't panic** if something breaks - you have backups!

Emergency Recovery

If Something Goes Wrong:

1. **Check your local backups** in `C:\StreamerbotData\Dashboard\`
2. **Look at GitHub history** - you can revert to previous versions
3. **Re-run Streamer.bot action** to generate fresh data
4. **Test with "metalbenji"** username to verify everything works

GitHub Revert Process:

1. Go to your repository
2. Click on "commits" (near the green Code button)
3. Find a working version
4. Click "Browse files" on that commit
5. Copy the working achievements.json content
6. Paste it back into the current file

Success Checklist

After each update, verify:

- ☐ Streamer.bot action ran successfully
- ☐ JSON file was generated without errors
- ☐ GitHub commit was successful
- ☐ Live site loads without errors
- ☐ Your username shows correct progress
- ☐ New achievements appear correctly

You're all set! Your viewers can always check their progress at: <https://achievements-dashboard.netlify.app/> 🏆
